## THE NEEDLE-FREE BIOREVITALIZATION

PRX-THERAPY is a revolution of needle-free biorevitalization.

Each session is **painless** and consists in the application of a product that stimulates the **skin's natural regenerative process**.

Your doctor will develop a **protocol** with you based on the expected result, **your aesthetic needs** and skin type, and will schedule a number of sessions.

The **first result is immediately visible** after the outpatient session. The home treatment maintains the beneficial effect and enhances it over time.

## PRX THERAPY

### COMBINED ACTION IN 3 STEPS

#### 1. Boost stimulation

The in-office treatment boosts your skin's natural deep regenerative process with the application of an exclusive and innovative product. The 10-15 minute session is completely painless, because no needles are used. After just one treatment **your skin will look firmer and brighter**.

#### 2. Nourish and protect

At home you can **nourish and protect** your skin with WiQo Nourishing and Moisturizing Cream, giving it all the nutrients it needs and preventing it from drying out.

#### 3. Continue stimulation

WiQo Smoothing Fluid acts day after day by lowering the pH of the skin, forcing it to restore its natural level. In this way, the skin stays active through a sort of **natural "exercise"**, resulting in continuous daily stimulation.

Ask this clinic for a protocol suitable for you

#### Natural regenerative stimulation

#### No needles and no pain

#### Neck and body
